

Step One

Locate at least one DataDot on the stolen item. The adhesive contains a UV trace that fluoresces under a standard blacklight. (Ex. engine compartment)

Step Two

Use a minimum 30x microscope to read the information on the DataDot.

(Hint: for best results, read DataDot against a white surface)

Step Three

- Click the Law Enforcement Box on the datadotdna.com/us homepage
- Click the Search PIN Database Box to begin access to the worldwide Database.
- Choose the Law Enforcement Agency button and enter your Validation Password. If you do not have a password call 800.546.4454.
